Beyond Plastic Molding

Prism Plastics, Inc. is an ISO 9001:2008 certified custom injection molder with top notch dedicated employees who are committed to exceeding our customer's every expectation.

With services including engineering assistance with initial concept development and product design, project management from prototyping through production tooling approval, molding, assembly,

custom packaging, and shipping, Prism Plastics' team will work with you to ensure that your products get to market in the fastest, most economical way.

At Prism Plastics we make your experience as easy as possible by paying special attention to the details to eliminate last minute changes and increased costs.

Prism Plastics, Inc. manufactures parts using virtually all engineering grades of thermoplastic resins including flexible PVC, PEEK, and PEI (Ultem).

**VALUE ADDED SERVICES:**

At Prism Plastics, Inc. we go *beyond plastic molding*. Challenge us with your tough projects and we'll step up to meet your needs.
